

Synapse: Revolutionizing Meeting Productivity with AI

Transforming Meeting Conversations into Clear Actions and Strategic Outcomes

The Problem

The Burden of Manual Admin Work

Professionals spend hours writing minutes, identifying tasks, and drafting follow-up emails.

This repetitive work consumes valuable time that could be spent on strategic activities.

Lost in Translation

Important discussion points and action items are frequently missed or misunderstood.

This leads to confusion and misalignment among team members.

The Clarity Challenge

Ambiguity around responsibilities and deadlines slows project progress.

Teams struggle to maintain momentum due to unclear expectations.

The Time Drain

The average professional spends 5 hours per week on post-meeting administrative tasks.

This represents a significant loss of productivity and adds to workplace stress.

Introducing Synapse: Your Intelligent Meeting Assistant

Overview of Synapse

Synapse automates the entire post-meeting workflow by transforming raw transcripts into clear summaries, actionable tasks, and instant communications.

It serves as an intelligent meeting assistant to streamline and enhance productivity.

Driving Accountability

Synapse converts discussions into well-defined, trackable tasks.

This ensures that all meeting outcomes are actionable and measurable.

Three Pillars of Value

Save Time: Eliminate tedious manual administrative work.

Create Clarity: Ensure everyone is aligned on decisions and next steps.

Visual Representation

A flow diagram illustrates [Meeting Transcript] flowing into [Synapse Logo].

It then branches out to [Summary + Task List + Draft Email].

From Meeting to Action in Seconds

Connect & Record

Meeting ends, transcript automatically imported into Synapse.

This ensures no time is wasted in manual transcription.

Analyze

Synapse processes the conversation to extract key insights.

This step provides a clear understanding of the discussion.

Review

User quickly reviews AI-generated summary, decisions, and tasks.

This allows for efficient validation of meeting outcomes.

Act & Export

Follow-up email sent and tasks exported seamlessly to Asana, Jira, or Trello.

This ensures smooth transition from planning to execution.

Features Designed for Productivity

Automatic Meeting Summary

Generates concise recaps of key discussions.

Ensures no important detail is overlooked.

Action Point Extraction

Identifies tasks, assigns owners, and sets deadlines.

Streamlines task management for enhanced productivity.

Decision Logging

Captures and records critical decisions made during meetings.

Provides a reliable reference for future actions.

Draft Follow-Up Email

Provides a ready-to-send email draft for quick communication.

Saves time and ensures consistent messaging.

Workflow Integration

Syncs effortlessly with popular project management tools like Asana, Jira, and Trello.

Enhances collaboration by integrating with existing workflows.

Study Case

Budi, a Project Manager in Semarang

Before Synapse

- Spent 30 minutes manually compiling notes and tasks after each meeting.
- Risked missing important tasks due to manual errors.
- Time-consuming administrative tasks hindered strategic focus.
- Manual processes led to inefficiencies in project management.

After Synapse

- Receives instant notifications and clear dashboard summaries.
- Exports tasks and sends follow-up emails with a single click.
- Reduced 30 minutes of manual work to just 2 minutes of smart clicks.
- Gained more time to focus on strategy rather than administration.

Why Synapse is Smarter: Powered by LLaMA

Traditional Script

- Relies solely on keyword detection for understanding conversations.
- Often misses nuances and subtleties in discussions.
- Fails to accurately capture tasks and decisions from meetings.
- Results in lower accuracy for actionable items and key decisions.

LLaMA Contextual Understanding

- Enables deep contextual understanding beyond simple keyword matching.
- Interprets conversational subtleties to extract tasks and decisions accurately.
- Captures nuances that traditional scripts overlook.
- Delivers higher accuracy in identifying actionable items and key decisions.

Creating Impact Across The Board

Cost Saving Efficiency

Reduces operational costs by minimizing administrative overhead.

This ensures resources are allocated more effectively.

CX Enhancement (Internal)

Improves employee experience by removing tedious, repetitive tasks.

This fosters a more engaging and satisfying work environment.

Productivity Boost

Speeds up project cycles through rapid follow-ups and clear task assignments.

This leads to faster project completions and streamlined workflows.

Holistic Organizational Impact

Drives better outcomes for teams and organizations alike.

This alignment ensures success across multiple dimensions.

What's Next for Synapse?

MS Teams and Jira Integration in Q1 2026

- Includes multi-language support such as Bahasa Indonesia.

Future Vision: Real-Time Voice Assistant

- Supporting meetings as they happen.

Beta Launch in Q4 2025

- Featuring Google Meet and Asana integration.

Advanced Meeting Analytics in Q2 2026

- Introduction of advanced meeting analytics features.

Closing & Call to Action

Summary of Synapse

Synapse is a productivity accelerator that transforms meeting conversations into tangible results. It represents a significant leap in workplace productivity through innovative implementation of LLaMA.

Call to Action for Judges

Judges are encouraged to recognize Synapse as the most impactful implementation of LLaMA for workplace productivity. The call is to collaborate in building this transformative future together.

Call to Action for Investors

Investors are invited to participate by providing \$XXX in pre-seed funding. This funding will accelerate development and user acquisition for Synapse.
